

Diabetes Treatment Satisfaction Questionnaire (change): DTSQc

In the last few weeks/months you have been taking part in a diabetes treatment study. At the start of the study you may have had a change of treatment. Today we would like you to tell us how you feel about your current treatment. The following questions ask you to compare it with the treatment you used (including medication and diet) before the study began. Please answer each question by circling a number on each of the scales to indicate the extent to which you have experienced changes. If you have experienced no change, please circle '0'.

1. How satisfied are you with your current treatment?

much more satisfied now	3	2	1	0	-1	-2	-3	much less satisfied now
----------------------------	---	---	---	---	----	----	----	----------------------------

2. How often have you felt that your blood sugars have been too high recently?

much more of the time now	3	2	1	0	-1	-2	-3	much less of the time now
------------------------------	---	---	---	---	----	----	----	------------------------------

Please make sure that you have circled one number on each of the scales.
