

The DCSQ

The DCSQ is owned by Health Psychology Research Ltd. ("HPR"). Users must have a licence from HPR, which is contactable either via its website at www.healthpsychologyresearch.com or by email at info@healthpsychologyresearch.com

The measure

The DCSQ includes 25 items designed to measure satisfaction with a broad range of aspects of the service provided by a diabetes clinic, e.g:

- education
- continuity of care
- waiting times
- privacy
- and many other aspects of patient experience

Respondents are asked to read each statement carefully and indicate whether the extent to which they are satisfied or dissatisfied with the service provided. A 'not applicable' option is provided in case the respondent has no experience of a particular aspect of the clinic.

The DCSQ was designed in consultation with diabetes specialists from many disciplines including medicine, nursing, podiatry, dietetics, ophthalmology and psychology. Two separate versions are available for use in 1) hospital diabetes clinics and 2) general practice diabetes clinics.

The DCSQ is recommended for analysis item-by-item. This means that each item is designed to be analysed individually and can be considered separately from other items.

Comment

The DCSQ was designed for use with adults (aged 18+) with Type 1 or Type 2 diabetes. The DCSQ is available in; English, English for Kenya and Tanzania, Swahili for Kenya and Swahili for Tanzania.

Availability

The DCSQ is made available to users by formal arrangement with Health Psychology Research Ltd. Requests should be made to info@healthpsychologyresearch.com. A user agreement is necessary to avoid breach of copyright and to ensure that the latest and most appropriate version of the questionnaire is used.

Evidence of licensing may be required by regulators, editors and/or examiners.

Contact Information
