

Diabetes Treatment Satisfaction Questionnaire (change): DTSQc

For the past few weeks/months you have been taking part in a diabetes treatment study. At the start of the study you may have had a change of treatment. Today we would like to know how you have found your current treatment (including medication and diet) compared with your treatment before the study began. Please answer each question by circling a number on every scale to indicate the extent to which you have experienced changes. If you have experienced no change, please circle '0'.

1. How satisfied are you with your current treatment?

much more satisfied now 3 2 1 0 -1 -2 -3 much less satisfied now

2. How often have you felt that your blood sugar has been unacceptably high recently?

much more of the time now 3 2 1 0 -1 -2 -3 much less of the time now
