

Diabetes Treatment Satisfaction Questionnaire (change): DTSQc

For the past few weeks/months you have been taking part in a diabetes treatment study. At the start of the study you may have had a change of treatment. Today we would like to know how your experience of your current treatment (including medication and diet) has changed from your experience of treatment before the study began. Please answer each question by encircling a number on each of the scales to indicate the extent to which you have experienced changes. If you have experienced no change, please encircle '0'.

1. How satisfied are you with your current treatment?

much more satisfied now 3 2 1 0 -1 -2 -3 much less satisfied now

2. How often have you felt that your blood sugar levels have been unacceptably high recently?

much more of the time now 3 2 1 0 -1 -2 -3 much less of the time now
